Profile Summary

Frontend Engineer with 4+ years of experience building scalable, high-performance web applications using **React, TypeScript, JavaScript, and modern UI frameworks**. Strong understanding of **data structures(Specialist @code360)**, and **real-time** data-driven UI development.

Experience

Infosys

April 2025 – Present

Senior Associate Consultant

Pune, Maharashtra

- Updated existing React dev-extreme library components which boosted **client satisfaction by 15 %**.
- Build dynamic, interactive dashboard using React **D3.js, Material UI, tinycolor2** library to visualize **real time customer interaction data** and received 90 % success rate.

Quinnnox

May 2023 – March 2025

Consultant

Mumbai, Maharashtra

- Led the end-to-end development of multiple features of Third Party Risk Application using **jQuery, DataTables, JavaScript, and REST APIs, asynchronous handling**, resulting in a **60% increase in client engagement**.
- Upgraded a React application** from **Node.js (10.0.0 to 18.20.1)** and SPFx (1.11.0 to 1.18.2) 50% faster than the planned timeline, optimized components, enhanced performance by **30%**.
- Developed complex, scalable and reusable UI components using **React Router, Redux, and Hooks**, optimizing performance with both functional and class-based components.
- Analyzed new requirements, tested using **POC**, provided **efforts estimations**, and implemented functionalities, improving project efficiency and delivery timelines.

LTIMindTree

October 2020 – May 2023

Software Engineer

Pune, Maharashtra

- Documented and standardized project artifacts, including **estimation plans, WBD, defect sheets, design specs, UAT documents, user manuals, and release notes**, ensuring compliance with work standards.
- Implemented CRUD operations, Autosave functionality, and comment handling, contributing to smoother user experiences using **JQuery on Azure..**
- Handled production related issues for **React and Node.js**, achieving a 90% resolution rate for critical issues.

Projects

Interactive-Dashboard | [GitHub](#) | [Live](#) | *React, TypeScript, Material-UI, D3.js*

- * Built an interactive React + TypeScript dashboard with D3 and Material-UI featuring **drill-down pie charts, dynamic line chart filters** (checkbox date-range), and a customizable data table with sorting and pagination.

FinSight AI | *Python, LLM, Langchain*

- * Developed an end-to-end LLM-powered news research tool using LangChain, OpenAI API, and Streamlit, enabling equity research analysts to efficiently analyze financial news. This project demonstrated real-world NLP application design, providing hands-on experience in building scalable, industry-relevant AI solutions.

Technical Skills

FrontEnd: React JS, TypeScript, JavaScript (ES6), Redux, jQuery, HTML5, CSS3, Bootstrap, Material-UI, D3.js

Backend/Databases: Node.js, REST APIs, MongoDB, Firebase

Tools and Services: Git, GitHub, Azure DevOps, Postman, Jira, VS Code

Additional Skills: Data Structures and Algorithms, Jest, Python

Education

Siddhant Institute of Computer Application (Percentage: 76.21)

2021– 2023

MCA (Master of Computer Applications)

Pune, Maharashtra

Sadabai Rasoni Women's College(Percentage: 80.64)

2017 – 2020

BSc-IT (Bachelor of Science in Information Technology)

Nagpur, Maharashtra

Certifications

- * Frontend (Coding Ninjas) || Python (Coding Ninjas) || GenAI (Google) || Microsoft DP-900 || Microsoft AZ-900 || Microsoft MS-900
